DETAILED ACTION

1. Applicant's Preliminary Amendment, filed 09/07/2005, is acknowledged.

Claim 1 – 29, 55 – 83, and 109 – 137 has been canceled.

Claims 30 – 54, 84 – 108, and 138 – 162 are pending.

2. The instant application appears to be in sequence compliance for patent applications containing nucleotide sequence and/or amino acid sequence disclosures.

Restriction Requirement

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 34 – 54, drawn to a method of treating an autoimmune disease, comprising administering a polypeptide of SEQ ID NO:2, classified in Class 514, subclass 12.

II. Claims 84 – 108, drawn to a method of treating an allergic disease, comprising administering a polypeptide of SEQ ID NO:2, classified in Class 514, subclass 12.

Art Unit: 1644

III. Claims 138 – 162, drawn to a method of treating an inflammatory disease, comprising administering a polypeptide of SEQ ID NO:2, classified in Class 514, subclass 12.

4. Groups I – III are different methods. The methods differ with respect to one or more of ingredients, method steps, and/or endpoints; therefore, each method is patentably distinct. Furthermore, these methods relate to different pathological conditions which are distinct because they differ in etiologies and therapeutic endpoints; thus each condition represents patentably distinct subject matter. The distinct ingredients, method steps, endpoints and/or pathological conditions require separate and distinct searches. As such, it would be burdensome to search these Inventions together.

5. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1644

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
